sealpath

DATA SECURITY TO YOUR LIMITS AND BEYOND:
SealPath, Your Remote Control for Protection

SealPath combines rights management, encryption, access control, monitoring, and response for total data security.

Control
Manages who accesses your data, when, and their permission level

Monitoring
Tracks who accessed your files and when, providing real-time alerts

Protection
Files stay encrypted at all times, wherever they travel or are accessed

Response
Takes action by remotely disabling access or adjusting user permissions.

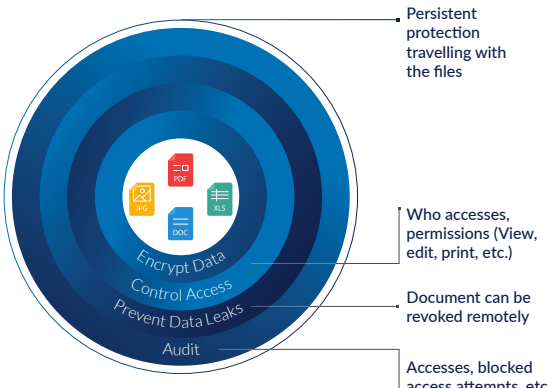
Instantly revoke access at any time.

Your data protected at rest, in use and in motion.

Key Benefits

- **Full data security:** Ensure continuous protection of your data, wherever it is, with an easy-to-use tool to prevent breaches and leaks.
- **Permanent Control:** Extend control over your data beyond your perimeter, preventing unauthorized usage and access to enhance security.
- **Constant Oversight:** Gain real-time visibility into data access, empowering faster responses to threats and minimizing the risk of data misuse or undesired exposure.

How it Works?



01
Protect any file

02
Share it as you want

03
Use your daily apps & tools

04
Monitor & Control

- **The user protects the file or it is automatically protected in a shared folder.**
- **Share the file using your preferred method: Email, USB, cloud...**
- **Access the document using your usual tools: Office, PDF...**
- **Monitor and control document usage, revoke access, or adjust permissions.**

Advanced Protection Settings

- **Granular usage control:** view only, edit, print, copy & paste, Full control.
- **Advanced Control Options:** offline access, watermarks, expiration dates, IP control.
- **Native integration with Microsoft Office:** Work directly without agents.
- **Revocation of access and permissions:** By file or policy, remotely and in real time.

Customer Success Story

"We were looking for a technology capable of focusing protection on very specific and critical information. Moreover, its use had to be adopted on a daily basis by the user. SealPath´s range of capabilities was the most complete."

- CISO, Company of the Rail industry

Cross-platform and broad compatibility

Use your usual tools: Office, Adobe acrobat, Foxit, AutoCAD, LibreOffice,

From the browser: Access, edit, protect and unprotect files easily.

Mobile and mac: Protect, view and manage permissions in macOS, iOS and Android.

File formats: PDF, LibreOffice, Office, CAD, Images, xps, plain text and many more.

Email Protection: Protect the body and attached files directly.

Automated protection

Document Repositories, File Servers & local folders: force the protection of documents stored in Windows, NAS and file servers or Box, Dropbox, Nextcloud, SharePoint, Google Drive or One Drive.
